The Honorable Steven F. McLaughlin
Rensselaer County Executive
Ned Pattison Government Center

Troy, NY 12061

Dear Mr. McLaughlin:

I am pleased to announce that Rensselaer County has been awarded \$730,577 under the New York State 2024 Statewide Interoperable Communications Grant Program (2024 SICG-Formula). This program, administered by my agency, allows for the State support to aid county, local and municipal public safety organizations in enhancing emergency response, improving capability, improvements in governance structures, operating procedures, infrastructure development, and addressing SAFECOM guidance from the U.S. Department of Homeland Security Office of Emergency Communications (OEC). The 2024 SICG-Formula Program will concentrate on improving interoperability and operability of communications systems in New York State. Your participation in this program is another example of the successful partnerships we have been developing for public safety and emergency preparedness across the State.

The performance period for the 2024 SICG-Formula grant will be 36 months, beginning January 1, 2024 – December 31, 2026, with the possibility of an extension based upon a good cause shown and ample justification for needing additional time. Expenses that you wish to claim must occur within that period. In order to provide these funds to you as quickly as possible, we will need to gather budget information within 45 calendar days from the date of this letter that reflects the award amount. Our Grants Program Administration staff will work with your designated SICG point of contact to provide additional administrative guidance and to develop a grant contract.

On behalf of Governor Kathy Hochul, the Division of Homeland Security and Emergency Services remains committed to providing outstanding support in the administration of *"your public safety first"* responder initiatives. Please feel free to contact me if you have any questions, at 518-242-5000, or my Office of Interoperable and Emergency Communications (OIEC) Director, Mark Balistreri, at 518-322-4939.

Thank you for your cooperation in this public safety endeavor.

Sincerely,

A handwritten signature in black ink that reads "Jacqueline Bray".

Sterilizing Gas (Oxyfume2002)

Airgas does not manufacture this product. It is purchased through Honeywell and distributed through Airgas. Therefore, this product cost is not controlled by Airgas. Pricing for this item is priced on request.

Monthly Rental Fees Calculation

Rental fees are based on end of month balance. Example: Rental rate \$1.24 each per month, end balance. If you have 10 cylinders, the calculation is $10 \times \$1.24 = \12.40 . This would be the rental rate for those 10 cylinders for that month.

Delivery Terms and Time

FOB Destination \$10.00/per delivery. No extra delivery fees will be charged. Cylinders will be delivered according to each individual facility's delivery requirements.

E-Commerce – Debbie James, Specialist

Airgas would like to offer their e-commerce site for you to use. The site is detailed to each member's account, allowing them to track orders, PO's, cylinder balances, invoices open and closed, and order history. The site has all the products purchased as well as the 180,000+ items in the Airgas catalog. Airgas staff will provide training on using the website.

Emergency Deliveries

Since emergency deliveries are a costly expense for AirGas, an incentive program has been established to keep emergency deliveries to a minimum. AirGas will pay UISS \$100/month if there are no emergency deliveries during each 30-day period for the participating facilities.

Value Added Services

- 1) Delivery of Cylinders during Off-Hours (5 pm - 8 am) - AirGas is willing to perform this service, but it would fall under the Emergency deliveries notation.
- 2) Delivery of Cylinders on Weekends - AirGas is willing to perform this service, but it would fall under the Emergency deliveries notation.
- 3) Delivery of Cylinders to Off-Site Locations - AirGas is willing to perform this service. Each case requires prior approval from AirGas.
- 4) Fill and Deliver Facility-Owned Cylinders - AirGas is willing to perform this service as long as cylinders are legal and in fillable condition. If not, AirGas will repair cylinders to a fillable and legal condition for the participating facility at a fee.

Cylinder Inventory

Cylinder management programs are critical to any gas vendor. AirGas Management has tested many different systems including bar-coding and has found their system of cylinder inventory to be as accurate as any electronic type. The steps are listed below:

- 1) Truck drivers are responsible for balancing all cylinders on their truck each day.
- 2) Beginning load counts and ending load counts are done each day.
- 3) Delivery tickets are reviewed and calculated against the drivers load sheets and checked for accuracy on cylinders delivered and cylinders returned.
- 4) Balance sheets are used to match cylinders delivered.
- 5) These balance sheets and delivery tickets are then turned over to a customer service representative who double checks all figures and signs off on the balance sheet.
- 6) After tickets are double checked, they are then posted into the computer for billing.
- 7) If there are any discrepancies, they are located and adjusted that day.

This double check system has been found to be more accurate than bar-coding by AirGas and assures accurate cylinder balances.

Physical Inventories

AirGas will perform physical inventories at each facility location on an annual basis. More frequent inventories can be performed upon request. If the count is within 10% of the actual inventory balance, there will be no charge for lost cylinders. AirGas will balance the overage/underage for cylinders for the entire group before charging any facility.

Cylinder Balance Discrepancies

If there is a cylinder balance discrepancy, Airgas will handle the matter in a fair and uniformed way. First, a cylinder audit will be completed. The audit will be performed by Airgas personnel and a member representative. After said audit, the results will be compared against current computer balances. If there is a discrepancy, the following will take place. For shortages under 10 cylinders, the count will be adjusted to a zero shortage. For discrepancies larger than 10 cylinders, a paper trail audit will be performed. If there is still a shortage, Airgas will bill the member for loss of use at a discounted rate based on cylinder size (see Replacement Cylinders Costs@).

To further illustrate how discrepancies will be handled, we included four examples below:

Scenario #1

Facility A requests a physical actual count of cylinders from Airgas. At the conclusion of that count, it is determined that the facility is missing 5 cylinders. Explain how Airgas will adjust the account since the number of lost cylinders is within the 10-cylinder tolerance level.

Airgas Response to Scenario #1

Airgas would simply make a cylinder adjustment removing the 5 cylinders from that facility's cylinder balance, after a physical in-house audit has been completed.

Scenario #2

Facility B requests a physical actual count of cylinders from Airgas. At the conclusion of that count, it is determined that the facility is missing 15 cylinders. Explain how Airgas will adjust the account and what additional steps will be taken to find the lost cylinders.

Airgas Response to Scenario #2

After performing the actual in-house cylinder count, Airgas would also perform a paper audit comparing actual delivery tickets, cylinders delivered, and cylinders returned against the monthly rental statements to check for possible posting errors. If no errors are found, as previously stated, Airgas will forgive 10 of the 15 missing cylinders. The remaining cylinders will be billed out to that facility as a loss of use billing, at the discounted rate for replacements, and adjustments will be made to the cylinder balances to reflect said changes.

Scenario #3

Facility C requests a physical actual count of cylinders from Airgas. At the conclusion of that count, it is determined that the facility is missing 20 cylinders. Six months later, another physical actual count is performed by Airgas and the 20 missing cylinders are found. Explain how Airgas will adjust the account and indicate whether or not credits will be issued to the facility.

Airgas Response to Scenario #3

Any missing cylinders that are recovered will be applied to that cylinder balance, and credits will be issued back to the facility against payments made on the loss of use billing.

Scenario #4

Facility D requests a physical actual count of cylinders from Airgas. At the conclusion of that count, it is determined that the facility has 5 extra cylinders on hand. Explain how Airgas will adjust the account.

Airgas Response to Scenario #4

Airgas would simply add the additional 5 cylinders to that facility's cylinder balance. If the facility wishes to return those extra 5 cylinders, Airgas would simply pick up the extra cylinders and no additional adjustments would be made to the account.

General Information

EMS, LLC has provided first-class facility maintenance, environmental, and laundry management contract services since 1976 specializing in healthcare facilities. With over 30 contracts, they pride themselves in having the talent and the resources to provide personalized and specialized customer service. Their mission is to deliver the highest quality of service at the most affordable price.

CONFIDENTIAL Agreement Details

EMS's pricing is based upon conducting a detailed survey of the member's facility to establish the labor, supply and equipment costs of the individual contract. Whether these costs are EMS's costs under a full service contract or the cost of the facility under a management only agreement.

1. **Reduced Cost**

Savings ranging from 5% and up to 10% compared to in-house operations.

2. **Improved Staff, Patient/Resident Satisfaction**

EMS consistently receives very high satisfaction scores. Raised HCAHP scores help acute care facilities increase reimbursement.

3. **Reduced Cross Infection**

The processes, chemicals and procedures that EMS employs reduce the risk of cross infection and overall control, meeting all CDC requirements.

4. **Improved Quality**

CONTRACT CHOICES

1. **FULL SERVICE** - All management and hourly staff are covered in the contract cost, on the EMS payroll and benefits program.
2. **MANAGEMENT FEE** - Facility staff remain on your payroll. The management is provided by EMS. Management, training, systems and programs are provided to maximize staff's efficiency and effectiveness. Labor savings is guaranteed.

MANAGEMENT SERVICES PROVIDED

Housekeeping - EMS' "Task Specialization" program uses HEPA filtered vacuums to remove dust and harmful particulates in patient/resident room floors, vents and ledges. High touch surfaces are cleaned and disinfected with **single-use** microfiber cloths.

Maintenance - Program ensures that all Life Safety requirements are scheduled and completed, i.e. weekly/monthly generator tests, Fire Drills, Smoke Doors etc. Preventive maintenance tasks are properly scheduled and conducted, extending the life of your capital equipment.

Laundry - Proper PAR levels are established. Laundry and resident clothes program is designed to increase productivity, simplify methods, control chemical usage and reduce costs.

EMS offers two types of contracts for UISS members.

Contract process and award rationale

COMPETITIVE CONTRACTING PROCESS Vizient awards product agreements to the suppliers that offer best overall value, as determined through a comprehensive contracting process that follows the principles of the American Bar Association's Model Procurement Code and involves participating member organizations to the greatest practical degree. The process uses member-driven criteria and a weighted award decision tool that considers financial and product specification/quality factors. This contract was awarded based solely on the results of this process.

Based solely upon the results of this process, Vizient awarded this category as described on page 1.

Request for proposal

Vizient issued a request for proposal in May 2019.

The RFP was issued to these suppliers: ThyssenKrupp ; Schindler ; Otis ; KONE.

Responses were received from these suppliers: ThyssenKrupp ; Schindler ; Otis ; KONE.

Proposal evaluation

In addition to financial value, the proposals were evaluated based on the following product specification /quality factors, which were developed and weighted by Vizient's Facilities and Construction Council in April 2019:

- Breadth & Depth ; Quality of Service ;Member Preference ; Terms and Conditions ; EPP

Member input

A member preference survey was conducted in January 2019 in conjunction with the request for proposal to assess which suppliers' members find acceptable and prefer to use. Results were factored into the award recommendation.

Best-and-final offer

Based on the scoring results, ThyssenKrupp ; Schindler ; Otis ; KONE were invited to submit their best-and-final pricing offer in November 2019.

Award validation

Based on the proposal scorecard results and the recommendation of the council, Vizient awarded this category as described above.

Vizient wishes to thank the members of the Facilities and Construction Council for their valuable direction and input into this award decision.

Dear Mr. Wilson,

This letter is to request that Rensselaer County allow the purchase of the boat that is currently being stored and operated by the Hemstreet Park Fire Department. The Hemstreet Park Fire Department has made all necessary repairs and stored the boat since 1988. The boat, motor, and trailer were provided by HPFD, and we have funded all repairs since 1988. In 2017, we refurbished the boat at a cost of approximately \$4,000. In 2023, we spent \$400 on repairs, and in 2024, we spent an additional \$1,200 on repairs. All of these repairs were carried out without any reimbursement from the county.

Given that we have covered all the expenses for repairs, operational costs, radio costs, refurbishments, and other associated costs, we would like to request that the county sell the Hemstreet Park Fire Department the boat for the nominal sum of \$1.

Should you have any questions feel free to contact me.

Sincerely

George Conover

Dear Jim,

I hope this message finds you well.

We are currently finalizing a contract for our network security services, which include CAD and 911 phone systems. Historically, we utilized the NYS Contract for this purpose. However, this service has been removed from the state contract, requiring us to explore alternative options.

Could you confirm if we are able to utilize other contract vehicles? The vendor appears to be listed under the following:

Re: Mission-Critical NetPulse® Advanced CAD

Dear Mr. Mainello:

Mission Critical Partners® (MCP) is pleased to provide the Rensselaer County, New York (County) Bureau of Public Safety with a letter proposal for the continuation of monitoring, technical support services, on-site computer-aided dispatch (CAD), and 911 call handling network support for the period ending June 30, 2026. This 12-month agreement will renew effective July 1, 2025.

This comprehensive umbrella NetPulse Advanced monitoring program includes:

- **Proactive System and CAD Network Monitoring:** Dynamic monitoring to detect and resolve issues before they cause failures, including the detection of performance issues
- **Help Desk:** 24 hours a day, seven days a week (24x7) for critical matters
- **Special Services:** Special projects and support requirements are possible and will be reviewed and quoted with the County's input. Pricing and a detailed scope of work will be provided to Rensselaer County where appropriate on a case-by-case basis—for example, for installation of new network appliances or servers.

Several factors make MCP well-qualified to ensure the success of Rensselaer County and with their CAD system and on-site support services, such as:

- **Dedication to Public Safety:** We specialize in support services for high-availability, high-performance and high-reliability mission-critical systems, such as 911 systems.
- **Holistic Monitoring:** Ability to monitor your entire CAD network holistically, including your CAD/RMS routers, servers, and other infrastructure.
- **Track Record:** Our clients will attest that our services are invaluable and that we are extremely reliable and responsive to their needs.

Scope of Work

Phase 1: Mission-Critical NetPulse Advanced CAD and 911

The NetPulse Advanced CAD program includes a comprehensive set of services:

- Maintain user guide—including contact information and help desk instructions
- Provide a help desk to answer questions, provide advice, and solve problems
- Dynamically collect status information
- Set thresholds for alerts
- Monitor the status of systems and networks (see below for details)
- Respond to tickets when something needs attention
- Assist with the computer-aided dispatch (CAD) and 911 operating system and application updates
- Analyze and report on conditions—provide monthly reports on routine matters and immediate reports on critical conditions and provide a dashboard view of activity, tickets, resolution, etc.
- Provide recommendations to keep systems and networks functioning properly
- Serve as an advocate for the agency when dealing with multiple support providers

Task 1.1: Systems and Network Monitoring

NetPulse Advanced CAD monitoring utilizes a computer or virtual appliance and Remote Monitoring and Management tools to collect and transmit data to the Mission Critical Partners® (MCP) network operations center (NOC). The following are representative of the conditions monitored:

Server Monitoring

- Virtual environments
- Disk utilization
- Print queues
- Event logs
- Backup logs
- Processor and memory utilization
- Services
- Error reports
- Time sync
- Logs for high availability disk arrays

Network Monitoring

- Device status (up/down)
- Packet loss to device
- Memory utilization
- Average response time (ping) to device
- Processor utilization
- Port utilization

Application Monitoring

- CAD/911 process status
- CAD/911 service status
- Log files

In summary, MCP monitors the environment and engages as soon as a detected issue requires attention.

Task 1.2: Problem Resolution for CAD/911

As issues are identified, MCP's services team follows a triage model, working along with your staff, to isolate the matter into one or more of the following categories:

- Application
- Storage
- Network
- Hardware
- Database
- Remote systems and interfaces
- Server
- Virtualization

Once the issue is assessed, MCP will resolve the issue or engage your staff and the other parties involved. We will monitor the status until the matter has been resolved.

Task 1.3: Communications and Reporting

Critical issues and conditions are communicated to the agency immediately. The other monitoring results are reported monthly, at a minimum. The monthly reports include the following:

- All issues detected
- Summary of tickets created
- Link to a customized dashboard
- Corrective actions taken
- Review of system performance and utilization
- Required site actions

In addition to these communications, MCP assists in organizing monthly status calls attended by a wide range of stakeholders, including management representatives, the primary users within the agency, the applications provider, information technology (IT) support personnel, and others.

Task 1.4: Help Desk

NetPulse Advanced monitoring includes a comprehensive telephone support desk for reporting issues, requesting services, solving routine matters, and answering questions during normal working hours, Monday through Friday, 8 a.m. to 5 p.m. Eastern Time, excluding holidays. The help desk and support are available 24/7/365 for critical matters impacting production operations

Agency Support and Facilities

The following are needed for MCP to monitor and perform troubleshooting triage of the systems and network:

- Remote access to the site using a virtual private network (VPN) or other secure access facilities.
- A server to support monitoring – can be a virtual machine.
- Ability to send email alerts and reports from the monitoring system to MCP.
- Agency contact to assist in coordinating support services.

Task 1.5: Premium Service

MCP recognizes that the associated network administrator responsibilities can be aided with a resource to support and administer the CAD and 911 server hardware. The up-to-eight hours per week of technical network support services and scope of work include:

- Support, configure, and maintain Rensselaer County's on-premise networks and networking hardware (see Exhibit 1: Equipment List for the full list of supported hardware).
- Identify and aid in the deployment of updates as needed.
- Support and administer CentralSquare Technologies (CST) CAD/911 routing device configurations.

- Aid in ensuring CST CAD/911 network security and connectivity.
- Monitor CST CAD/911 network performance and monitor for faults and incidents.
- Facilitate access controls for CST CAD/911 routing hardware.
- Resolve problems reported by end-users on the CST CAD/911-supported hardware.
- Aid in defining CST CAD/911 network policies and procedures.
- Support research and make recommendations regarding CST CAD/911 network architecture.

Project Team

MCP recognizes that as an independent solutions provider, our corporate capabilities depend directly on the qualifications and experience of our staff. A multifaceted project such as this requires different areas of expertise and knowledge—typically more than any one or two individuals can bring—because different areas of expertise often are needed at various project stages. MCP has assembled one of the country's most experienced and knowledgeable teams.

Table 1: Fee Schedule

Description of Service	Invoice Schedule	Monthly Fee	Annual Fee
NetPulse Advanced CAD/911	Annually	\$2,253.75	\$27,045

Mission Critical Partners proposes to deliver services on a per-hour basis based on GSA Schedule 70, Contract #GS-35F-0410X, with meals and lodging defined at federal per diem rates. An invoice shall be submitted each month and will include the percentage of work performed and expenses incurred relevant to the fee and shall be reviewed and paid within 30 days of receipt.

Any additional services will be performed at MCP's then-current fee schedule. Prior to initiating any such additional work, MCP would require a formal letter of authorization from Rensselaer County.

Based on the current MCP understanding of what is to be accomplished, the pricing identified represents an estimate of the work anticipated to achieve project success. MCP's priority is for this project to be successful for Rensselaer County.

Assumptions

- The costs presented in this proposal will remain valid for 90 days.
- Price includes workstation support as described within the proposal during on-site resource visits unless otherwise arranged in advance.
- A listing of equipment to be monitored can be found in Exhibit 1.
- To the extent that MCP can support cyberattack restoration, a separate time and materials agreement will be required at the time of the support request.
- MCP and Rensselaer County roles and responsibilities requirement matrix for this project can be found in Exhibit 2.
- Monitoring and support of the CAD is for the CentralSquare Technologies CAD environment being used for historical data and not in use for new records.
- Rensselaer County will work with MCP to provide access and credentials for monitoring of network devices.

FSC/PSC CLASS D302 ADP SYSTEMS DEVELOPMENT SERVICES

Mission Critical Partners (MCP) leverages expertise and consulting services to assist clients in maximizing the opportunities for implementation of broadband ecosystem networks that meet critical needs. Two decades invested in life safety communications has equipped our team to navigate the complex broadband issues.

MCP improves public safety and homeland security through roadmaps for transitioning to Emergency Service Internet Protocol Networks (ESInet). The technology:

- Allows first responders to send and receive video and data.
- Reduces costs through interagency collaboration.
- Helps support opportunities to acquire additional funding required for operating expenses.
- Promotes innovation in the development and deployment of next-generation networks, applications and alert systems.
- Promotes cyber security and critical infrastructure survivability to increase user confidence, trust and adoption of broadband communications.
- Promotes shared resource allocation on common network platforms.

As a foundation for a project's success, MCP drives meaningful government and civic engagements with representatives in support of local efforts to deploy broadband technologies. We also help entities understand and follow policies and standards to maximize incentives for national priorities in health care, public education and economic opportunity.

To ensure value for the client's investment, MCP collects and analyzes benchmarks. We then provide comprehensive reviews of wholesale competition rules, make recommendations that include innovative approaches to FCC changes, and ensure efficient collaborative allocation and use of government-owned and government-influenced assets.

MCP's broadband services include a consultative, holistic approach to Next Generation (IP-centric) emergency service networks, features, and functions:

- Governance development
- Network gap analysis
- Network architecture design
- Request for Proposal (RFP) development
- Financial analysis and modeling
- Vendor implementation oversight
- Network operations framework development with an IT Infrastructure Library (ITIL) emphasis
- Broadband security gap analysis

FSC/PSC CLASS D306 ADP SYSTEMS ANALYSIS SERVICES

Forensics and Systems Analysis

Mission Critical Partners' proven advocacy skills for our clients are the crux of our forensics services. Forensics analysis can be used to locate the root cause(s) of a system failure, verify receipt of full value on a contract or purchase, and assist in a formal court determination of facts.

By establishing current conditions and benchmarking against recognized communications best practices, the MCP team develops a practical solution set for improvement in service delivery. Our team provides change agent services for sustainable organizational recovery. Each forensic engagement involves a comprehensive three-step investigation:

- (1) Data Gathering and Fact Finding
- (2) Analysis and Perspective
- (3) Findings and Recommendations

Contract Compliance

MCP represents our clients' interests by executing a logical information gathering process to understand contract objectives and then performing a methodical review of documents and responsibilities. If we find discrepancies, MCP recommends a corrective course of action. We establish a plan with milestones, metrics, communications, assigned responsibilities and manage client risk to maximize return on investment.

Invoice Forensic Review

MCP has a knowledge base in tariff structure and telecommunications invoicing that often reveals overpayment for services. The MCP team specializes in network, routing, database and fee collection. Applying our forensics skills, we generate findings and recommendations for cost recovery and negotiate settlements on behalf of our clients at little financial risk to the client.

Incident Forensics

MCP provides assessment services to define and mitigate risk. Any system can have components (or technicians) that do not perform as intended, potentially resulting in a loss of life or property. In a pre-event environment, our team evaluates call routing, switching, database integrity, system performance, operating guidelines, and training for service optimization. Post-event, MCP assesses equipment or process failures to define causal effects. We understand the high visibility of any event where system or human error negatively impacts reliable service, and we offer improvement recommendations without prejudice.

Systems Analysis

Systems analysis, design and implementation are other key services MCP provides. In today's mission critical environment, the various technologies and applications used to manage risk are integrated with one another in the successful operational environment, and no one system stands alone. By understanding the need for high-reliability, low-risk performance in the 24/7 world, MCP applies our extensive knowledge of technology, telecommunications, policy, operations, and accountability to achieve success on behalf of the client.

Next Generation Services

The Mission Critical Partners (MCP) staff has extensive experience with planning, designing, procuring, negotiating and implementing all Next Generation call delivery and processing elements. As stated throughout the industry, Next Generation is a journey. Simply put, the systems and user environment will continually evolve with new technologies, processes and expectations.

The MCP project team lays out a clear Master Plan that recognizes the impact NG has on all aspects of the user operations, budgets, planning, training, and ability to deliver service. As Next Generation drivers, MCP helps elected officials, managers, stakeholders and funding agencies understand the NG impact upon all systems including technology, human, policy and funding.

The MCP approach is to establish a thorough understanding of the environment unique to each PSAP or region. This includes funding models, system life-cycle analysis, objectives, incident processing approach, network resources, and governance opportunities. While many firms simply want to discuss call delivery, MCP develops a plan for incident processing, incident dispatch and data management. MCP develops a comprehensive Master Plan for the agency or region and a conceptual design to NG deployment. The Master Plan considers all options and establishes timely deployment by incrementally upgrading technology and recommending policy, funding and governance modifications.

The MCP team is experienced in:

- Master Planning
 - Capital Plan
 - Operational Impact
 - Schedule and Governance
- Design
- Procurement (Network, telephony)
- Network Services
- Systems Convergence and Integration
- Microwave & Wireless Broadband
- Computer Aided Dispatch (CAD)

- Records Management
- Customer Premise Equipment
- Routers
- Switches
- Mobile Data
- Applications

Data Conversion Services

Mission Critical Partners (MCP) staff cumulatively brings more than 50 years of experience in the management and operation of Public Safety Answering Points (PSAPs), Emergency Operations Centers (EOCs) and emergency call centers – and their related automated systems. Management of these automated systems includes data conversion and database management expertise. The integration of mission critical data into and among these [potentially] disparate automated systems requires an expertise in data conversion and database management. MCP is familiar with industry standards and recommended best practices that pertain to data conversion and database management, and has the ability to assure that data conversion-related tasks are completed in accordance with these standards and best practices, but within the realities of today's operational environment.

Our experience in data conversion tells us that the single most important focus during these tasks is one of accountability – accountability of all involved parties. By establishing current conditions against industry standards and recommended best practices, MCP is able to forge a reasonable data conversion plan that is actionable and implementable with the involved parties and vendors. Benchmarks are identified, and timetables established, recognized, agreed-upon – and enforced. Further, the integrity of the converted data is paramount. CAUTION: EXTERNAL

Andrew –

We have to go to resolution for this purchase as it exceeds our purchasing threshold. Is there anyway we can get updated or extended quotes as the resolution will not be approved until July 8/11/2025.
The earliest we can get on the agenda would be the August meeting which we will have to submit 7/11/2025.

Thank you,
Todd Jojo

Memorandum

To: Budget/County Attorney

From: Joe Teliska

Date: 07/16/2025

Re: CR 68 – NYSDOT SA#1

Master Agreement with NYSDOT

As per Resolution G/286/17 – available funding for Design Phases I-V (ROW Incidentals only) in FFY 2017 = \$201,000 (80% Federal and 20% Local). The County understood a supplemental agreement with the NYSDOT would be established at a later date to cover the costs of Design Phase V (ROW Acquisition) and Design Phase VI. As a result, the County made **\$255,000** available (to match the TIP for FFY 2017 and 2018 = \$201,000 + \$54,000).

Agreement with Consultant

As per Resolution G/287/17 – design agreement with Consultant = \$249,579. *Resolution authorizes County Engineer to approve change orders not to exceed 20% of original contract.*

CO #1 with Consultant – Feb. 2020

County Engineer approved CO #1 = \$33,585. Consultant cost = \$249,579 + \$33,585 = \$283,164.

Resolution G/232/20

Added \$33,585 to the Local share of the project to cover CO #1 with the Consultant. Total cost available to the project = \$255,000 + \$33,585 = **\$288,585** available. This Resolution

Draft Resolution for August 2025 – NYSDOT SA #1

This draft Resolution adds an additional \$53,200 in Federal funds providing a total of \$214,000 in Federal funds eligible for reimbursement through the NYSDOT. The total amount available to the Capital project remains at **\$288,585** (the Consultant's current contract amount remains at \$283,164).

- This SA#1 adds \$49,000 in STBG Lg Urban Funds for Preliminary Design and adds \$17,500 in STBG Lg Urban funds for ROW incidentals
- This Master Agreement adds \$151,000 in STBG Lg Urban funds for Preliminary Design (Phases I-IV) and adds \$1,600 in STBG Lg Urban funds for ROW Incidentals.
- At this time the non-federal share of Project costs identified for federal aid funding in this agreement is to be provided entirely by the Municipality. No subsidy or reimbursement of any portion of that local match is provided by New York State=s Marchiselli Program or this contract at this time. Furthermore, this Agreement does not assure that any Marchiselli aid for the Project or phase hereunder will be authorized or available in the future. If the Project (and the phase of work) is eligible for State aid under the Marchiselli Program, and such aid is duly requested by the Municipality, NYSDOT may (subject to budgetary requirements) submit an appropriate request for Marchiselli funding authorization by the Legislature. If Legislative authorization for such funding is received, NYSDOT and the Municipality may enter a supplemental agreement providing such Marchiselli aid. Only then would Marchiselli aid be available to the affected Project and phase.

Executive Summary

Discovery Compliance Coordinator

The Rensselaer County Sheriff's Office Highway Patrol is proposing the establishment of a new position: **Discovery Compliance Coordinator**, to replace the current **Warrant Control Clerk** role. This shift reflects the evolving needs of the department and the growing complexity of digital evidence management and discovery compliance requirements.

The Discovery Compliance Coordinator will absorb and expand upon the duties currently held by the Warrant Control Clerk. These existing responsibilities include managing the 10-8 in-car video camera system; archiving, organizing, and uploading files to the Digital Evidence Management System (DEMS); coordinating warrant management tasks; and facilitating the secure transfer of digital evidence, including video and documentation, from the Sheriff's Office to the District Attorney's Office.

In addition to these core duties, the Discovery Compliance Coordinator will oversee the Axon video suite, specifically case building and digital evidence transfers via Axon Evidence.com. The Axon suite includes body worn camera systems, "Fleet 3" ALPR in-vehicle camera systems, Axon capture and Axon community requests. This role will also manage FOIL- video related requests, including video redaction when necessary, and serve as a subject matter expert on the Evidence.com portal.

Further responsibilities include supporting backend management of the Tyler Records Management System, particularly in serving as a liaison between the Records Management System (RMS) and its end users.

This position is critical to maintaining compliance with modern discovery laws and ensuring efficient, accurate, and secure handling of all digital evidence and warrant-related processes within the Sheriff's Office.

DISCOVERY COMPLIANCE COORDINATOR

Background:

In January 2020, New York State replaced Article 240 of the CPL with a new discovery statute – Article 245. The new statute requires discovery compliance with shortened timeframes and vastly expands the materials which are required to be turned over. In response, prosecutors must use digital platforms to interface with law enforcement, courts and attorneys. This drastic change in prosecutorial procedure places enhanced responsibilities upon law enforcement agencies. Accordingly, a dedicated administrator is required in order to facilitate and supervise the agency's compliance with Article 245.

Duties and Responsibilities:

- Function as point of contact to administer and supervise law enforcement compliance with criminal justice reforms.
- Act as liaison with other law enforcement agencies.
- Coordinate interagency and intra-agency communication as it pertains to criminal justice reforms.
- Scan and track case files with District Attorney and LEO requests and data entry.
- Monitor training opportunities and forums to address reform-related issues.
- Represent the agency at meetings related to criminal justice reforms.
- Remain current in emerging issues in criminal justice reform.
- Monitor and coordinate NYS technology (Tyler and DEMS) for compliance with criminal justice reforms.
- Maintain and track all Discovery efforts and supporting law enforcement agencies within Rensselaer County.
- Maintain an excel database, analyze the results of data pertaining to all items of discovery to monitor compliance.
- Be able to provide basic tech support and/or training on new technology (DEMS, Tyler RMS and Axon vehicle and body worn cameras, etc.) to all staff.
- Write, maintain and perform step-by-step instruction manual, as needed.
- Other duties as assigned.

Required Knowledge, Skills and Abilities:

- 4+ years of experience in legal industry, as a paralegal, project manager, and/or within an office that maintains confidential documentation.
- Experience managing spreadsheets, databases, and reports.
- Computer expertise with downloading video and audio materials.
- Solid PC skills including MS Office (in particular Excel) as well as aptitude to utilize various reporting and data sources.

MINIMUM QUALIFICATIONS:

- A. Graduation from a regionally accredited or New York State registered college or university with a Bachelor's Degree; OR
- B. Graduation from a regionally accredited or New York State registered college with an Associate's Degree and two (2) years of experience in legal work or information technology; OR

WHEREAS, The gold ribbon is the international symbol for childhood cancer and many individuals will wear gold or a gold ribbon during the month of September to help raise awareness for pediatric cancer and honor or memorialize the children who have fought this disease; and

WHEREAS, Cancer in children and young people is relatively uncommon compared to adult cancers and can be quite different from cancers affecting adults because they tend to occur in different body parts and respond to treatment differently; and

WHEREAS, Because of major treatment advances in recent decades, 85% of children with cancer will now survive 5 years or more which is a huge increase since the mid-1970s, when the 5-year survival rate was about 58%; and

WHEREAS, Although progress has been made in combating pediatric cancer, many infants, children and teens will suffer from long-term side effects of comprehensive treatment, including secondary cancers; and

WHEREAS, There is significant progress that still must be made with regard to childhood cancer treatment; progress towards an effective treatment is painfully slow with dramatically fewer new FDA approved treatments for childhood cancer approved each year than for cancer in adults; and

WHEREAS, The designation of September as "Childhood Cancer Awareness Month" could increase the rate of early detection, lead to newer and improved treatments, and an overall higher survival rate for children diagnosed with the condition; and

WHEREAS, The County of Rensselaer wishes to support the fight against childhood cancer in any way possible so that we may give any child diagnosed with cancer the best chance possible; and

WHEREAS, "Rensselaer County Goes "Gold" Month" is an initiative intended to raise awareness of the issue of childhood cancers, and the Rensselaer County Legislature would like to support such a campaign to help raise awareness in honor of the young patients, their loved ones, and all those who support them; now, therefore, be it

RESOLVED, September 2025 is designated "Childhood Cancer Awareness Month" in the County of Rensselaer to promote awareness of pediatric cancer and to support the brave children who battle cancer every day; and, be it further

Resolution No. P/34

RESOLUTION URGING NEW YORK STATE TO PRESERVE THE HISTORIC MARTIN DUNHAM RESERVOIR AND DAM IN GRAFTON LAKES STATE PARK, AND TO UTILIZE AVAILABLE STATE AND FEDERAL FUNDS TO REPAIR AND PROTECT THIS VITAL RESOURCE

WHEREAS, The Martin Dunham Reservoir, located in the Town of Grafton, Rensselaer County, was constructed beginning in 1911 as a critical water supply for the City of Troy, reflecting the ambitious planning and regional importance of the project; and

WHEREAS, Over the past century, the dam and reservoir have evolved into a central feature of Grafton Lakes State Park, now owned and operated by New York State, and remain a valued environmental, recreational, and historical asset for residents of Rensselaer County and visitors from across the Capital Region; and

WHEREAS, Following an engineering analysis of the dam's condition, the structure was designated a High Hazard Dam, prompting the State to evaluate potential future actions, including the deeply concerning option of decommissioning the dam—an action that would drain the reservoir and permanently alter the landscape, ecosystem, and recreational value of the area; and

WHEREAS, Just over three years ago, the New York State Office of Parks, Recreation and Historic Preservation (OPRHP) applied for FEMA funding to conduct a feasibility study for the decommissioning of the Martin Dunham Reservoir Dam; and

WHEREAS, On Thursday, July 24, 2025, members of the Legislature joined other elected officials and many members of the community who gathered at the Martin Dunham Reservoir for a rally to raise awareness about the importance of saving the dam and reservoir, successfully shining a media spotlight on this vital issue and uniting voices in support of preservation; and

WHEREAS, New York State has invested hundreds of millions of dollars into large-scale recreational and economic development projects, and it is both reasonable and necessary for the State to allocate a portion of its Environmental Protection Fund or other appropriate funding sources toward repairing and preserving the Dunham Reservoir and its dam; and

WHEREAS, The Rensselaer County Legislature also calls upon United States Senators Charles Schumer and Kirsten Gillibrand and other federal representatives to assist in securing FEMA or other federal funds to support the preservation of the dam and reservoir and to oppose any effort to use federal dollars for decommissioning the dam and reservoir; and

WHEREAS, The Rensselaer County Legislature believes that preserving the Martin Dunham Reservoir and its dam is essential to honoring the region's history, protecting the environment, and maintaining access to quality outdoor recreation for current and future generations; now, therefore, be it

RESOLVED, That the Rensselaer County Legislature strongly urges Governor Kathy Hochul and Commissioner Pro-Tem Randy Simons of the New York State Office of Parks, Recreation and Historic Preservation to take all necessary steps to preserve the Martin Dunham Reservoir and Dam and to reject any proposal that would result in its decommissioning or draining; and, be it further

RESOLVED, That the Legislature urges state officials to allocate Environmental Protection Funds or any other suitable funding sources to make the needed repairs to the dam and reservoir; and, be it further

RESOLVED, That the Legislature encourages United States Senators Charles Schumer and Kirsten Gillibrand and all relevant federal agencies to support the use of FEMA or other federal resources to repair and preserve the dam and reservoir, and to oppose the use of federal funds for decommissioning efforts; and, be it further

RESOLVED, That copies of this resolution be transmitted to Governor Kathy Hochul, Commissioner Pro-Tem Randy Simons, U.S. Senators Charles Schumer and Kirsten Gillibrand, State Senator Jake Ashby, Assemblyman Scott Bendett, and all others deemed necessary by the Clerk of the Legislature.

WHEREAS, Hoosick Road (New York State Route 7) is a critical transportation artery serving the Town of Brunswick, the City of Troy, and the broader Capital Region, functioning as a vital corridor for freight movement, tourism, and regional connectivity between Vermont and the New York State Thruway; and

WHEREAS, The Route 7 corridor has experienced a significant increase in commercial and residential development, including new supermarkets, fast food establishments, and apartment complexes, with additional projects currently under consideration; and

WHEREAS, While such development has contributed to local economic growth and increased municipal revenues, it has also resulted in substantial traffic congestion, with peak-hour travel times exceeding 12 to 15 minutes for a stretch of just 2.5 miles; and

WHEREAS, The corridor accommodates more than 25,000 vehicles daily, leading to frequent delays, heightened accident rates, and growing unpredictability for commuters and emergency services; and

WHEREAS, Residents have expressed escalating concerns regarding noise pollution, air quality, and safety risks for pedestrians and cyclists, all of which have adversely impacted quality of life in the surrounding communities; and

WHEREAS, The 2024 Hoosick Corridor Road Study has identified specific mitigation strategies to address these infrastructure challenges.
